

Examples of Small-Scale Infrastructure on State Land funded under the Pilot Infrastructure Funding Scheme

Case #1 - Provision of handrail on footbridge across Geylang River near 10 Jalan Batu

The Residents' Committee had requested for safety handrails on a footbridge across the Geylang River, as many elderly residents found it difficult to climb up the staircase without railing support.

Case #2 – Lightings along a footpath near Punggol Point LRT Station

LTA utilised the pilot infrastructure funding scheme to install lightings for a footpath connecting Ponggol Seventeenth Ave to Punggol Point LRT Station to improve safety for commuters in the estate.
