

4 Purr-sitive Steps

when you see a **community cat**:

Place wire/plastic mesh on gates

This will prevent cats from entering your premises.

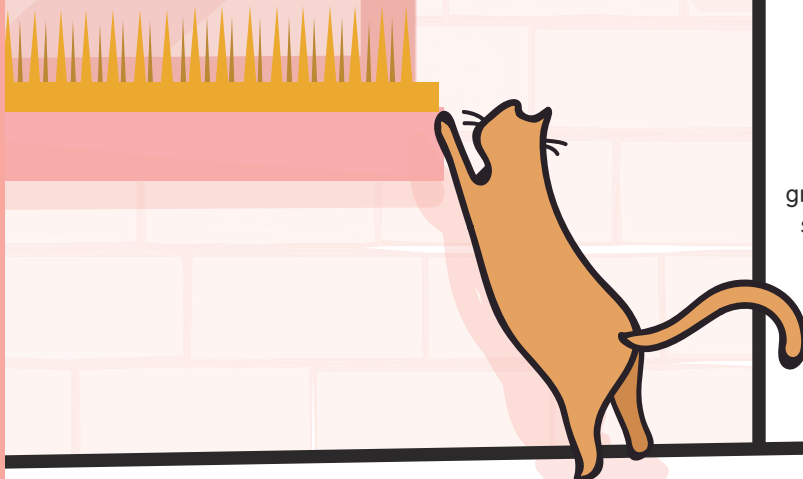

Use natural and sonic repellents

White vinegar and citrus peels can be sprayed and sprinkled onto areas to deter cats from defecating there.

Place rubber spike mats

These mats may discourage cats from climbing ledges or digging up gardens and flower pots.

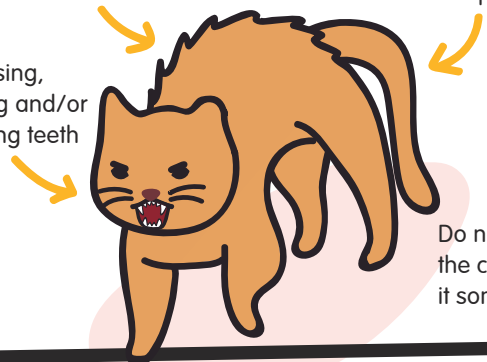

Understanding a cat's body language

(a cat exhibiting these behaviours may feel threatened by you and react aggressively)

Arched back, fur is raised/standing

Overall tense posture

Hissing, growling and/or showing teeth

Do not approach the cat, and give it some space.
