

Don't Bee Alarmed! Bee Calm!

3 tips on what to do:

Bees are integral to the ecosystem! Most bees in Singapore are docile and pose little or no safety risk.

Keep your distance

Don't disturb the hive.

You can report it using the OneService app. Should the issue require urgent attention, please contact NEA at 6225 5632.

Cover your head and move away

Be careful not to trip.

Run towards shelter. Don't swat at bees as this will make them aggressive. Don't jump into water as agitated bees may continue to attack after you emerge.

Don't smack the bee!

It may sting or release alarm pheromones that will attract more aggressive bees.

Calmly move the part of your body that the bee landed on. Gently brush it off if the bee still doesn't move.
